

JOVOLT
ENERGIZING GREENER JOURNEY

COMPANY PROFILE 2024

Tel: +962771007100
Amman, Jordan

Who We Are

JOVOLT was founded in 2023, It is a leading professional EV Station user.

JOVOLT is a listed company background of high-tech enterprise.

JOVOLT was conceived by a number of experts who have an extensive experience in different sectors including green energy, green business and the EV sub-sector.

JOVOLT came into being to capitalize on the trend in Jordan to support green businesses and green energy.

The focus was to create a firm that promotes green energy products starting from EV's.

Jordan's economy and current energy model is in the process of being reformed to cover more green energy products that allow for alleviating energy costs that are a main burden on the economy and the citizen.

Jordan will not be the only target for JOVOLT and aspirations cover expanding to the region.

Strengths

JOVOLT prices will be very competitive as they aware that each customer has his own charging station at home, therefore JOVOLT will provide their customer with the best prices and charging experience to build long and profitable relationship with their customers

JOVOLT facilities will provide their customer with a state of the art charging experience through providing restaurants and café and playing area for kids..

JOVOLT will locate their station in easy access places near the main roads so the electrical vehicle driver will find the station very near to his location

Products & Services

JOVOLT has catered for a number of products and services to ensure the adaptation of constantly updated market and different sorts of clients. Services and products are ever-changing and ever adapting to market research and updates, client wishes and requirements and competitiveness in the sector.

The products and services are as follows:

EV Station Establishment:

JOVOLT has obtained preliminary approvals to establish and operate EV charging stations in different cities in the Hashemite Kingdom of Jordan.

Supplier of EV Charging Units:

JOVOLT is working with different EV manufacturers to become suppliers in the region for EV charging units.

Transfer of Knowledge on the EV Technology:

JOVOLT will provide consultancy services related to the EV sector as well as other green business.

Support any Green Business Initiative:

JOVOLT supports different green businesses through working on different activities and partnerships with the different stakeholders.

Opportunities

Jordan market is witnessing a rapid increase in electrical vehicles ownership, which make the market in escalating need for EV charging stations.
